

# **Quantum mechanics of photons**

**Iwo Białynicki-Birula**

*Center for Theoretical Physics, Polish Academy of Sciences  
Al. Lotników 32/46, 02-668 Warsaw, Poland*

Quantum mechanics of photons is usually handled within the framework of the electromagnetic field quantization. I will show that the photon treated as an elementary particle can also be described within the framework of relativistic quantum mechanics. This formulation gives a better understanding of such concepts as helicity, polarization and spin.
